

Highlights

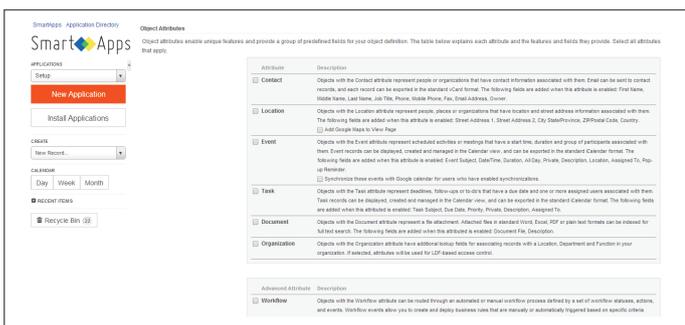

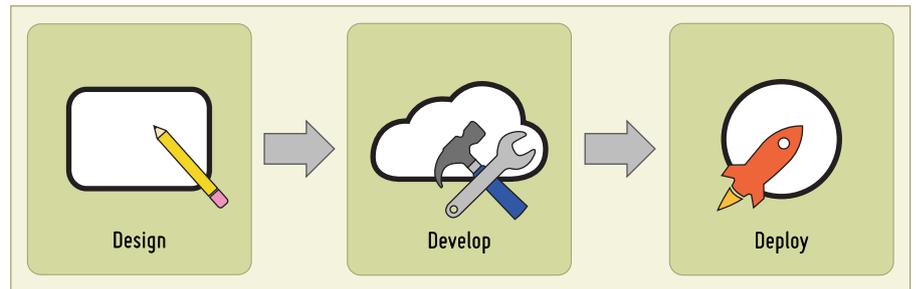

- ▶ Accessible from anywhere
- ▶ No additional software required
- ▶ Drag-and-drop functionality
- ▶ Minimal coding
- ▶ Access to library of pre-built application templates
- ▶ Seamlessly integrated development and deployment

Join the Smart Revolution with SmartApps!

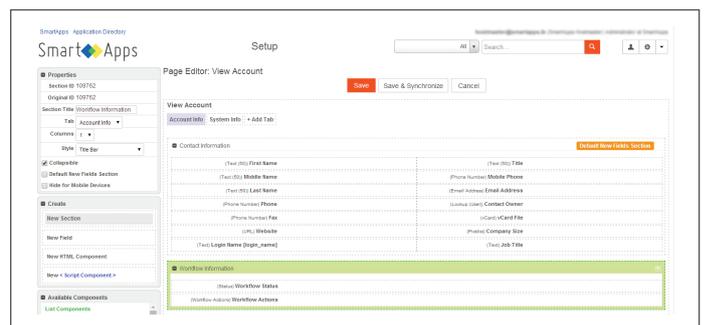

Now you have the opportunity to turn your app ideas into a reality – anytime, anywhere!

SmartApps is a cloud based platform that enables **rapid application development (RAD) and deployment** of SaaS (Software as a Service) applications accessible from both mobile and web. All you need is a browser and an internet connection - with no additional software installation required.

Wherever you may be, SmartApps gives you the indispensable work-from-anywhere flexibility which is vital in today's world.

Predefined attributes are available in order to build objects quickly and easily

The full-function WYSIWYG HTML editor helps users rapidly build and assemble Web-based UIs

A New Generation of Smart Developers

SmartApps opens the doors to the next generation of Smart Developers. Featuring a comprehensive toolset and a user-friendly interface, application development is now easier than ever. The simple **drag-and-drop, point-and-click environment**, is 80% clicks and rest 20% code. So anyone from a tech-savvy business user, to an IT professional or software developer, can develop an app within a matter of hours.

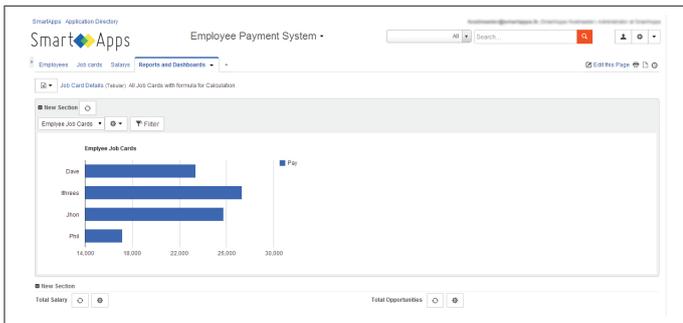

Not only can you build your desired app, you can then deploy it on the SmartApps environment and market it to your customer base as well. It provides you with a secure platform featuring multi-tenancy and metering, enabling you to become a SaaS provider with minimal investment.

Extend the Capabilities of Existing Systems

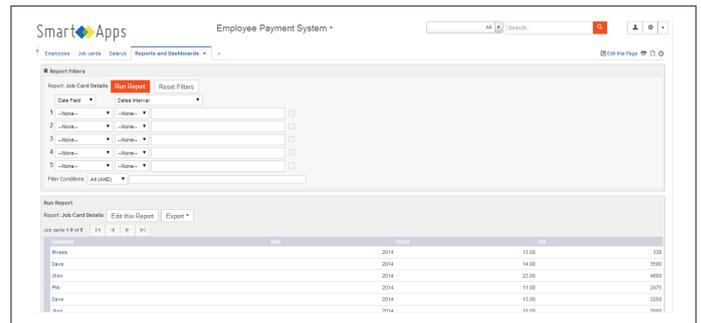

SmartApps provides seamless integration with your current applications, enabling a hybrid environment (on-premise and cloud) or even integration with your existing cloud environment.

Keep your existing business logic intact while adding value to your applications with the **workflow and mobile capabilities** of SmartApps. This will not only extend the lifetime of your existing systems, but will also allow you to reach out to a larger customer base.

You have the flexibility to choose a plan based on your specific requirements. Have access to a hassle-free environment without the burden of hardware cost, licensing, hosting and maintenance with SmartApps.

Flexible and comprehensive reporting

Features

- ▶ **Runs anywhere**, not restricted by vendor lock-in
- ▶ Access to a library of pre-built **sample application templates**
- ▶ Automated **migration tools/templates**
- ▶ **Custom branding and App Store** for ISVs and Resellers
- ▶ Seamless connection with **existing Progress-based applications** and other SaaS business applications
- ▶ Connection to several **external data sources**
- ▶ Out-of-the-box integration with **Google products**
- ▶ **SOAP, REST and Ajax APIs** available

Benefits

- ▶ **Easy to learn, easy to use** – all you need is access to an up-to-date browser and an internet connection, with no additional software requirements
- ▶ **Minimal coding, model driven** – simple drag-and-drop, point-and-click interface requires minimal coding, thus you do not need to be a programmer to create an app
- ▶ **Anytime, anywhere access** – SmartApps applications all run in the SmartApps platform and deploying an app just entails adding users and assigning permissions
- ▶ **Secure, reliable and available** – you can benefit from the easy maintenance and control systems available on the platform
